What ProductTraq does

ProductTraq helps companies with their supply chain chemical handling compliance.

It's a set of cloud-based solutions for Substance Volume Tracking, document management including SDS Distribution, and supplier questionnaires that bridges the gap between manufacturing/sales systems and what regulations require.

About ProductTraq SDS Distribution

The ProductTraq SDS distribution feature supports companies with their legal requirement to provide new safety data sheets when significant revisions are made to customers who have purchased product within 12 months.

Features & Benefits of ProductTraq SDS Distribution

- Independent of SDS authoring package: Provides flexibility and allows integration with low cost online SDS packages
- Import existing SDS library: Preserves historical SDS assets
- Emails with links to SDS: Efficient email transmission with secure links for tracking
- Monitor customer clicks: See who has accessed the latest SDS, and who hasn't
- Allows for alternatives to email: Provides for manual intervention alternatives to email
- Customizable email templates: Your own style and wording for different client sets
- Supports multiple languages: Notification emails in customers' appropriate language
- Subscription Rental Pricing Model: Low entry costs with no long term commitment
